REACH SVHC Reporting

Regulation (EG) 1907/2006

We refer to the REACH SVHC candidate list as of **January 19, 2021**. Please note this for your reporting.

We, the signees confirm to you that...

...our products and their packaging supplied to these customers DO NOT contain substances from the current SVHC Candidate List with more than 0.1 mass percent.

...the products and their packaging below contain hazardous substances according to the current SVHC Candidate List with more than 0.1% mass percent.

| Product/Article | Product-/Article-No. | CAS Number (hazardous substance) | Typical concentration |
|-----------------|----------------------|-------------------------------------|--------------------------|
| | | | |
| | | | |
| | | | |
| | | | |

Alternatively, you can send us your list of products with more than 0.1 mass percent of REACH SVHC by E-Mail!

Optionally we confirm that...

...we are following further legislation and future updates to the SVHC candidate list. For all existing and new products as well as their packaging, we inform the customer's purchase department within 4 weeks in case of changes, indicating the relevant SVHC substance. Important note: If you do not confirm this point, we will ask you regularly, twice a year, to ensure material compliance.

ECHA SCIP database account

Since January 5, 2021, products containing SVHCs have to be registered in the ECHA SCIP database (Substances of Concern in Articles and Products).

Do you already have an ECHA SCIP database account (SCIP Legal Entity UUID)?

If you do not have an ECHA SCIP database account yet, please tell us the date when you will probably have an ECHA SCIP database account.
